The Nuclear Shadow: India's Dance with the Non-Proliferation Treaty

The year is 1974. A blinding flash erupts over the desert sands of Pokhran, India. The world watches, stunned, as a nuclear mushroom cloud rises, marking the dawn of a new era for India. But this victory is bittersweet. It carries with it a heavy burden: the shadow of the Non-Proliferation Treaty (NPT), a document that India, despite its nuclear aspirations, refused to sign. A Story of Two Worlds: The NPT, signed in 1968, aimed to prevent the spread of nuclear weapons technology. It divided the world into two distinct camps: the "haves," the nuclear-armed states recognized before 1967, and the "have-nots," who were expected to forgo nuclear weapons in exchange for access to peaceful nuclear technology. India, a nation struggling to find its footing after independence and a recent war with Pakistan, felt that this treaty was unjust. It believed the NPT was discriminatory, favoring the existing nuclear powers while denying the same right to other nations, especially those facing existential threats. **The Indian Perspective:** India saw itself as a victim of nuclear blackmail, particularly after China's nuclear tests in 1964. Its own development was hampered by the threat of nuclear weapons, and it believed the right to nuclear deterrence was crucial for its national security. This was further compounded by the ever-present threat from Pakistan, which conducted its first nuclear test in 1998, sparking a nuclear arms race in the region. **A Complex Web of Reasons:** India's refusal to sign the NPT stemmed from a multifaceted tapestry of

motivations. • Historical Injustice: India argued that the NPT was discriminatory, allowing the nuclear powers to maintain their arsenals while denying the same right to developing nations. This, they felt, was a legacy of colonial history and a perpetuation of the power imbalance between the West and the East. • **The Shadow of Pakistan**: The escalating tensions with Pakistan, coupled with its nuclear ambitions, fueled India's determination to pursue its own nuclear path. The fear of being outmatched by Pakistan, which was also not a signatory to the NPT, was a significant factor. • **The Nuclear Umbrella**: India felt constrained by the "nuclear umbrella" provided by the United States to its allies in Asia, particularly Japan and South Korea. They believed this created a dependence and vulnerability, and their own nuclear program was seen as a way to break free from this reliance. **The Consequences**: India's nuclear program, culminating in the Pokhran tests, had significant consequences. It led to international sanctions and diplomatic isolation, with countries like the United States imposing severe restrictions on trade and technology transfer. However, India persisted, viewing these sanctions as a testament to its commitment to its national security.

The Nuclear Tests: A Turning Point

The 1998 Pokhran tests were not just about technology. They were about a nation asserting its sovereignty and challenging the established order. The tests marked a shift in the global power dynamics, bringing India into the ranks of nuclear-armed nations, albeit with a heavy price to pay. **The Nuclear Power Game**: India's nuclear program wasn't just about military might. It was also about securing energy independence and advancing scientific prowess. India, with its vast population and growing energy needs, saw nuclear power as a vital resource for its economic development. Its nuclear program, while controversial, also advanced its technological capabilities, placing it among the world's leading nuclear powers. The Nuclear Landscape Today: Today, India stands as a nuclear power, but its relationship with the NPT remains complex. While it still refuses to sign the

treaty, it has undertaken various steps to demonstrate its responsible nuclear behavior. It has signed the Comprehensive Test Ban Treaty (CTBT), pledged to a "No First Use" policy, and has a robust system for controlling its nuclear program. **The Nuclear Narrative: A Story in Progress:** The story of India and the NPT is a story of resilience, of a nation determined to chart its own course amidst a world of complex geopolitics. It is a story of strategic maneuvering and a constant negotiation with the world stage. Whether India will eventually sign the NPT remains an open question. But what is certain is that its nuclear story will continue to be one of complexity, nuance, and evolving narratives.

Beyond the Treaty: A Look at the Future

While the NPT debate continues, India has taken proactive steps to engage with the international community on nuclear issues. **The Civilian Nuclear Deal:** One significant milestone was the 2008 Indo-US Civil Nuclear Deal. This agreement, after years of negotiations, granted India access to civilian nuclear technology and fuel, a significant step towards legitimizing its nuclear program. The deal was a strategic triumph for India, allowing it to tap into global resources for its nuclear power program without compromising its security concerns. **The Nuclear Security Summits:** India has actively participated in the Nuclear Security Summits, a series of global initiatives focused on preventing nuclear terrorism and enhancing nuclear security. This participation demonstrates India's commitment to responsible nuclear stewardship and its willingness to collaborate on global security issues. *India's Nuclear Strategy:* India's nuclear doctrine is based on a principle of "credible minimum deterrence," meaning it maintains a sufficient nuclear capability to deter any potential aggression. This strategy is a delicate balance between ensuring national security and avoiding nuclear proliferation.

The Way Forward: Navigating the Nuclear Labyrinth

India's nuclear journey is a testament to its complex relationship with the NPT. It is a journey marked by strategic maneuvering, calculated risks, and a constant struggle to navigate the world's nuclear landscape. **The Future of Nuclear Non-Proliferation:** The NPT remains a cornerstone of the international nuclear order. However, it faces increasing challenges as new players emerge on the world stage and technological advancements blur the lines between peaceful and military applications of nuclear technology. *The Role of India:* India, with its growing nuclear capabilities and its history of defying the NPT, has a crucial role to play in shaping the future of nuclear non-proliferation. Its actions and policies will have a significant impact on the international nuclear landscape. **A Call for Dialogue:** The future of nuclear non-proliferation requires dialogue, transparency, and a commitment to shared security. India, with its own complex experiences, can play a vital role in building a more secure and stable nuclear order.

The story of India and the NPT is far from over. It is a story of complex geopolitical realities, strategic choices, and a persistent struggle

for a secure and stable world. As India continues its nuclear journey, the world watches, hoping that this nation's choices will lead towards a brighter future, one where the threat of nuclear annihilation fades into the past.

The Nuclear Tightrope: Understanding the Non-Proliferation Treaty and India's Unique Position

The world of international relations is often a complex dance of treaties, alliances, and strategic calculations. Among the most crucial of these is the Non-Proliferation Treaty (NPT). This landmark agreement, designed to curb the spread of nuclear weapons, has shaped global security for decades. But what exactly is the NPT, and why does India, a prominent nuclear power, stand outside its fold? Let's dive deep into this fascinating and vital topic.

What is the Nuclear Non-Proliferation Treaty (NPT)?

At its core, the NPT is a 1970 international treaty whose primary objective is to prevent the spread of nuclear weapons and weapons technology, to promote cooperation in the peaceful uses of nuclear energy, and to further the goal of achieving nuclear disarmament. It's often described as the cornerstone of the global non-proliferation regime.

The Three Pillars of the NPT

The treaty operates on three fundamental pillars:

1. **Non-Proliferation:** This is the most obvious pillar. Non-nuclear-weapon states party to the treaty agree not to acquire nuclear weapons.

2. **Disarmament:** Nuclear-weapon states party to the treaty (the five recognized permanent members of the UN Security Council – the US, Russia, UK, France, and China) commit to pursuing nuclear disarmament in good faith.
3. **Peaceful Use of Nuclear Energy:** All parties have the right to access nuclear technology for peaceful purposes, such as generating electricity, under safeguards administered by the International Atomic Energy Agency (IAEA).

The NPT is a legally binding treaty, and its review conferences, held every five years, are crucial for assessing its implementation and strengthening its effectiveness. The success of the NPT in preventing the emergence of many new nuclear-armed states is undeniable. However, it's also a treaty with inherent complexities and has faced significant challenges over the years.

Why India is Not a Signatory to the NPT

This is where India's story becomes particularly intriguing. Unlike most of the world's nations, India has never signed the NPT. This isn't out of defiance or a desire to proliferate, but rather stems from India's long-held strategic and principled stance on nuclear weapons and global security.

India's Historical Context and Nuclear Program

India's journey towards nuclear capability began in the 1940s, driven by a desire for self-reliance and a need to ensure its security in a volatile region. Unlike countries that developed nuclear weapons during the Cold War arms race, India's initial motivations were rooted in national security concerns and a desire to deter potential aggression. In 1974, India conducted its first

nuclear test, codenamed "Smiling Buddha," which was presented as a "peaceful nuclear explosion." This event marked a significant turning point, as it demonstrated India's indigenous nuclear capabilities and drew international scrutiny.

The NPT's Perceived Imbalance

India's refusal to sign the NPT is largely based on the argument that the treaty is discriminatory. India, along with many other nations, views the NPT as perpetuating a divide between nuclear "haves" and "have-nots." The treaty legally recognizes the five nuclear-weapon states that tested before 1967, while prohibiting all other states from acquiring nuclear weapons. India argues that this framework does not adequately address the security concerns of states that face existential threats and were not part of the original nuclear club.

"The NPT, in its current form, is inherently flawed as it entrenches the possession of nuclear weapons by a few states while denying it to others," stated a senior Indian diplomat in a recent forum. This sentiment captures the core of India's position on the non-proliferation regime.

India's Commitment to Disarmament

Interestingly, India's stance against signing the NPT does not equate to a disregard for nuclear disarmament. India has consistently advocated for complete and universal nuclear disarmament. It believes that a world free of nuclear weapons is the ultimate goal. However, India maintains that disarmament cannot be achieved through a treaty that it perceives as unfair and inequitable. India's nuclear doctrine is strictly "no first use," meaning it will not be the first to use nuclear weapons in any conflict. This policy underscores its defensive posture and its commitment to responsible nuclear stewardship.

The 1998 Nuclear Tests and International Response

In 1998, India conducted a series of nuclear tests, followed by Pakistan. These tests brought India squarely into the category of nuclear-weapon states in the eyes of the international community, despite not being a signatory to the NPT. The international response was a mix of condemnation and sanctions, but over time, the global perspective has evolved. Many nations have come to acknowledge India's nuclear capabilities and its responsible approach to nuclear weapons.

The Evolving Global Nuclear Landscape and India's Role

The global nuclear landscape is constantly shifting. The rise of new geopolitical challenges, the potential for nuclear proliferation to non-state actors, and the ongoing debate around disarmament all contribute to the complexity of the NPT's future. India, as a major global player and a responsible nuclear power, plays a significant role in this evolving landscape.

India's Contributions to Non-Proliferation Efforts

Despite not being an NPT signatory, India has actively participated in and contributed to global non-proliferation efforts. It has strong export controls on its sensitive technologies and materials and participates in multilateral export control regimes. India also engages in dialogues and discussions on nuclear security and disarmament at various international forums. Its commitment to the peaceful use of nuclear energy is evident in its growing civil nuclear program, which adheres to international safety standards.

The Indo-US Nuclear Deal and its Implications

A significant development in India's relationship with the NPT regime was the Indo-US Civil Nuclear Agreement, finalized in 2008. This agreement, a testament to years of diplomatic effort, allowed India to separate its civilian and military nuclear facilities and subjected its civilian program to IAEA safeguards. In return, the US and other NSG (Nuclear Suppliers Group) countries agreed to engage in full civil nuclear energy cooperation with India. This deal was a crucial step in India's reintegration into the global nuclear order, acknowledging its status as a nuclear power while promoting its civilian nuclear ambitions.

This deal was a game-changer, as it recognized India's unique nuclear status and its commitment to responsible nuclear power generation, even outside the NPT framework. It also opened doors for India to participate more actively in global nuclear governance discussions.

The Future of the NPT and India's Future Role

The NPT remains a vital instrument in preventing nuclear proliferation, but its long-term effectiveness will depend on its ability to adapt to the changing global realities. For India, the path forward likely involves continued engagement in multilateral forums, advocating for universal disarmament, and reinforcing its commitment to responsible nuclear stewardship. The ongoing discussions about strengthening the NPT's review process and addressing the concerns of non-signatories will be crucial in shaping its future.

India's position on the NPT is a reflection of its independent foreign policy and its commitment to a secure and equitable world order. While the debate about its NPT status may continue, India's role as a responsible

nuclear power and its dedication to disarmament are undeniable. Understanding India's unique position within the global nuclear non-proliferation framework is essential for comprehending the complexities of international security in the 21st century.

The Non-Proliferation Treaty and India: Navigating Global Disarmament and National Stance The Nuclear Non-Proliferation Treaty (NPT), established in 1968 and entered into force in 1970, stands as a cornerstone of global efforts to prevent the spread of nuclear weapons, promote disarmament, and facilitate peaceful uses of nuclear energy. India's relationship with the NPT is complex and shaped by its strategic autonomy, historical context, and evolving role in international security. As a nuclear-armed state that has never signed the treaty, India occupies a unique position—neither fully integrated into the NPT framework nor isolated by formal non-participation, but instead operating under a nuanced policy of controlled engagement.

Historical Context and India's Nuclear Identity

India's decision to remain outside the NPT stems primarily from its rejection of the treaty's perceived discriminatory structure. Signed during a Cold War era when nuclear privileges were largely reserved for the five recognized nuclear weapons states—United States, Russia, the United Kingdom,

France, and China—India viewed the NPT as reinforcing a hierarchy that denied developing nations equal access to nuclear technology for peaceful purposes. After conducting its first nuclear test in 1974 and reaffirming its nuclear capability in 1998, India consciously embraced a policy of nuclear autonomy, grounded in self-reliance and strategic deterrence. This stance reflects a broader commitment to national sovereignty and non-alignment, even as it navigates global expectations on non-proliferation.

India's Practical Engagement with NPT Principles

Despite not being a signatory, India actively aligns with many core NPT objectives. The country adheres to strict export controls on sensitive nuclear materials and technology, supports international safeguards through cooperation with the International Atomic Energy Agency (IAEA), and promotes multilateral dialogue on nuclear risk reduction. India's voluntary moratorium on nuclear testing since 1998 and its participation in confidence-building measures demonstrate a de facto commitment to disarmament principles. These actions signal that while India operates outside the formal NPT structure, it upholds a responsible nuclear posture in line with the treaty's spirit.

Benefits of Selective Engagement with NPT Norms

India's approach offers tangible benefits. By avoiding rigid treaty constraints, it preserves strategic flexibility to develop and modernize its nuclear deterrent without external interference. Simultaneously, India leverages its NPT-aligned behavior to enhance global credibility, positioning itself as a reliable partner in regional stability and non-proliferation diplomacy. This balance enables India to serve as a bridge between nuclear-armed states and non-aligned nations, fostering inclusive dialogue

while safeguarding its national interests. The ability to shape norms from a position of pragmatic autonomy strengthens India's influence in shaping future disarmament frameworks.

Future Outlook: Evolving Dynamics and Strategic Possibilities

Looking ahead, India's relationship with the NPT is likely to remain adaptive rather than static. As global nuclear dynamics shift—with emerging technologies, regional tensions, and renewed disarmament debates—the country may pursue deeper engagement through alternative mechanisms. Opportunities exist for enhanced transparency, including potential participation in nuclear risk-reduction initiatives or bilateral agreements that complement NPT goals. India's growing role in multilateral forums and its push for UN Security Council reform suggest that its voice could be instrumental in redefining non-proliferation architecture to reflect multipolar realities. While full NPT accession remains politically sensitive, incremental alignment with its principles may offer a pragmatic path forward. Ultimately, India's journey with the Non-Proliferation Treaty reflects a broader narrative of balancing sovereignty with global responsibility. By navigating this complex terrain with strategic foresight, India continues to shape the future of nuclear governance—one rooted in realism, pragmatism, and a vision for a more equitable security order.

India advocates for universal, non-discriminatory nuclear disarmament.
2	What is India's stance on nuclear weapons despite not being an NPT signatory?	India maintains a 'no first use' policy and is committed to a 'credible minimum deterrence'. Its nuclear arsenal is solely for self-defense and is under civilian control, aiming to deter aggression.
3	How has the NPT impacted India's nuclear program and international relations?	The NPT has historically led to India's nuclear isolation. However, a landmark civil nuclear agreement with the US in 2008 has facilitated nuclear trade and cooperation, acknowledging India's responsible nuclear stewardship outside the NPT framework.
4	What are the key arguments India makes against the NPT's perceived inequalities?	India's primary argument is that the NPT creates a hierarchy of states, failing to address the fundamental issue of disarmament by existing nuclear powers. It calls for a time-bound program for complete nuclear disarmament, which the NPT hasn't achieved.

5	What is India's role in global nuclear disarmament efforts, given its NPT status?	Despite not signing the NPT, India remains committed to global nuclear disarmament. It participates in international forums like the Conference on Disarmament and advocates for a world free of nuclear weapons, though its approach prioritizes gradual, verifiable disarmament by all states.

Enhancing Reading Experience

Enhancing the reading experience of Non Proliferation Treaty And India is essential for maintaining focus, improving comprehension, and reducing fatigue during long study or reading sessions. Digital formats provide

numerous tools and customization options that allow readers to tailor their experience according to personal preferences and learning styles.

One of the most effective ways to enhance comfort is by using night mode or adjusting background colors. Night mode reduces blue light exposure and lowers eye strain, especially during evening or low-light reading sessions. Alternatively, sepia or soft gray backgrounds can provide a paper-like appearance that feels more natural to the eyes during extended use.

Font size, font style, and line spacing adjustments also play a significant role in reading comfort. Increasing font size and spacing improves readability and reduces visual stress, particularly on smaller screens. Many reading applications allow users to customize these settings, ensuring that *Non Proliferation Treaty And India* remains comfortable to read across different devices and environments.

Highlighting and annotating key sections transforms passive reading into an active learning process. By marking important concepts, definitions, or arguments, readers engage more deeply with the content. Annotations allow users to add personal insights, questions, or reminders directly alongside the text, making future reviews more efficient and meaningful.

Taking regular breaks is another important factor in enhancing reading experience. Prolonged screen exposure can lead to eye strain and reduced concentration. Following structured reading intervals—such as reading for a set period and then resting—helps maintain mental clarity and physical comfort. Digital tools that track reading time or offer reminders can support healthier reading habits.

Optimizing focus and comprehension

Minimizing distractions improves comprehension when reading *Non Proliferation Treaty And India*. Disabling notifications, using distraction-free reading modes, or switching devices to offline mode can significantly

enhance focus. Some applications offer dedicated reading modes that hide menus and unnecessary elements, allowing readers to concentrate fully on the content.

Combining reading with brief reflection sessions further enhances understanding. After completing a chapter or section, summarizing key points mentally or in written notes reinforces learning and improves retention. This approach turns Non Proliferation Treaty And India into an interactive learning tool rather than a static document.

The Non-Proliferation Treaty and India: A Complex Relationship Navigating Nuclear Ambitions and Global Security

The Nuclear Non-Proliferation Treaty (NPT) stands as a cornerstone of international efforts to prevent the spread of nuclear weapons and foster global disarmament. However, India's unique position as a nuclear-armed state outside the NPT has created a persistent and complex dynamic within the treaty's framework. This article delves into the intricacies of India's relationship with the NPT, examining its historical context, ongoing challenges, and future implications for nuclear non-proliferation and international security.

Understanding the Non-Proliferation Treaty (NPT)

Opened for signature in 1968 and entering into force in 1970, the NPT is a landmark multilateral treaty with three core pillars: non-proliferation, disarmament, and the peaceful use of nuclear energy. Its objective is to prevent the spread of nuclear weapons and weapons technology, promote cooperation in the peaceful applications of nuclear science, and ultimately

lead to nuclear disarmament by all states. The treaty divides states into two categories: Nuclear-Weapon States (NWS) – those that had detonated a nuclear device before January 1, 1967 (the five permanent members of the UN Security Council: the United States, Russia, the United Kingdom, France, and China) – and Non-Nuclear-Weapon States (NNWS). NNWS parties to the treaty pledge not to acquire nuclear weapons, while NWS parties commit to pursuing nuclear disarmament and sharing the benefits of peaceful nuclear technology.

India's Nuclear Journey: A Divergent Path

India's nuclear journey predates the NPT. Driven by a desire for strategic autonomy and national security, India conducted its first nuclear test, codenamed "Smiling Buddha," in 1974. This event, declared a "peaceful nuclear explosion" (PNE), was met with international condemnation and led to sanctions. India has consistently maintained that its nuclear program is purely for defensive purposes and has refused to sign the NPT as a non-nuclear-weapon state, viewing it as discriminatory and a tool of the NWS to maintain their dominance. India's stance has been rooted in the principle that nuclear disarmament should be a universal and non-discriminatory process, rather than a selective one that perpetuates existing power imbalances. India's subsequent nuclear tests in 1998, alongside Pakistan's, further solidified its status as a de facto nuclear-weapon state and intensified global concerns regarding nuclear proliferation.

The Core of the Conflict: India's NPT Stance

India's refusal to join the NPT as a non-nuclear-weapon state stems from several key arguments:

1. **Discriminatory Nature:** India argues that the NPT is inherently discriminatory, creating a permanent divide between nuclear "haves" and "have-nots." It believes the treaty legitimizes the existing nuclear

arsenals of the NWS while preventing other states from acquiring them for legitimate security reasons.

2. **Incomplete Disarmament:** While the NPT commits NWS to nuclear disarmament, India, like many NNWS, has viewed the progress in this area as glacial and insufficient. It contends that the NWS have not fulfilled their disarmament obligations in good faith.
3. **Security Imperatives:** India's security environment, particularly its complex relationship with nuclear-armed neighbors like China and Pakistan, has been a primary driver of its nuclear weapons program. India views its nuclear arsenal as a vital deterrent against nuclear blackmail and aggression.
4. **Sovereign Right:** India asserts its sovereign right to ensure its national security through any means it deems necessary, including the development of nuclear weapons.

Key Developments and Engagements

Despite not being a signatory, India has engaged with the NPT regime in various ways, particularly after the 1998 tests:

The 123 Agreement and Civil Nuclear Deal with the US

A significant turning point in India's relationship with the international nuclear order was the Indo-US Civil Nuclear Cooperation Agreement, often referred to as the "123 Agreement," which came into effect in 2008. This landmark deal allowed India to separate its civilian and military nuclear programs and conduct international civil nuclear commerce. Under this agreement, India agreed to place its civilian nuclear facilities under International Atomic Energy Agency (IAEA) safeguards, a crucial step towards its integration into the global nuclear governance. This agreement was a testament to the recognition by some key NWS of India's responsible stewardship of nuclear technology and its strategic importance.

IAEA Safeguards and India's Commitment

India has voluntarily placed a significant portion of its civilian nuclear facilities under IAEA safeguards, demonstrating its commitment to transparency and the responsible use of nuclear technology. This adherence to safeguards, even outside the strict NPT framework, has been a key factor in fostering trust and facilitating cooperation with other nations.

India's Role in Multilateral Nuclear Diplomacy

India has actively participated in various multilateral forums and discussions related to nuclear disarmament and non-proliferation, including the Conference on Disarmament. It has consistently advocated for universal, non-discriminatory nuclear disarmament and has proposed various initiatives aimed at achieving this goal.

Challenges and Criticisms

India's nuclear status and its relationship with the NPT have not been without controversy and criticism:

1. **Perceived Hypocrisy:** Critics argue that India's stance on the NPT, while maintaining nuclear weapons, appears hypocritical, especially when it advocates for disarmament.
2. **Undermining the NPT:** Some international observers believe that India's de facto status as a nuclear-weapon state outside the NPT framework weakens the treaty's authority and could set a precedent for other states to pursue nuclear capabilities.
3. **Arms Race Concerns:** The presence of nuclear weapons in South Asia, particularly between India and Pakistan, has fueled ongoing concerns about regional instability and the potential for an arms race.

The Future of India and the NPT

India's relationship with the NPT is likely to remain a dynamic and evolving one. Several factors will shape this future:

1. **Global Disarmament Progress:** The pace and sincerity of nuclear disarmament efforts by the NWS will continue to influence India's stance. If meaningful progress is made, it could create a more conducive environment for India to reconsider its position.
2. **Evolving Security Landscape:** Regional and global security dynamics, including the rise of new threats and the geopolitical shifts, will continue to play a crucial role in India's strategic calculations.
3. **Strengthening of IAEA Safeguards:** Continued strengthening and universalization of IAEA safeguards will be essential for building trust and ensuring the peaceful use of nuclear technology globally.
4. **India's Growing Influence:** As India's global influence continues to grow, its role in shaping the future of nuclear governance and non-proliferation efforts will become even more significant. India has been a proponent of a phased and time-bound approach to nuclear disarmament.

Conclusion: A Pragmatic Approach to a Nuclearized World

India's position on the NPT is a reflection of its unique historical trajectory, security imperatives, and a deeply ingrained belief in universal disarmament. While its non-adherence to the treaty has been a subject of ongoing debate, India has consistently demonstrated a commitment to responsible nuclear stewardship, particularly through its civilian nuclear program and its engagement with the IAEA. The future of nuclear non-proliferation will undoubtedly be shaped by how India and the NPT regime continue to navigate their complex relationship. A pragmatic approach that acknowledges India's legitimate security concerns while reinforcing global

non-proliferation norms will be crucial for maintaining a stable and secure international order in the nuclear age. The pursuit of a world free from nuclear weapons remains a shared aspiration, and India, despite its current stance, continues to be a significant voice in this critical global dialogue.
